

FROM THE PRESIDENT

Hi Everyone,

Spring is upon us! We have some great events coming up that I'm excited to share with all of you. Back in early February, we had our **first meeting dedicated to energy efficiency in laboratories** at a beautiful venue in Cambridge, courtesy of BioMed Realty. We heard from some excellent speakers with diverse backgrounds and saw many new faces in the crowd.

The snowstorm in mid-March postponed our annual ASHRAE/AEE joint meeting on Geothermal Systems, but we're looking forward to hearing from the presenters on March 28. We're also proud to be **co-hosting a free webinar on Building Community at Work with CWEEL on March 31.**

On April 6, we'll be touring Keurig Dr Pepper's headquarters in Burlington, MA and hearing from Paul Lukitsch (KDP's Sr. Facilities Manager) on their recent successes in their new energy efficiency initiative. There will even be a complimentary barista bar for our guests as they enter the building. Register now while there is still space! Registration links to each of these meetings are provided in the Upcoming Events section below.

Rounding out the year, **we'll be having an event geared toward young energy professionals on May 10.** We also look forward to hosting our annual AEE New England Golf Outing on June 20. As we near the end of the 2022-23 meeting season, we're already setting up future meetings for 2023-24 and are always **open to feedback and ideas from our member base for topics. Feel free to send those to info@aeenewengland.org.**

Last but certainly not least, thank you again to all of our sponsors for helping to make all of this happen. We here at AEE New England continue working at providing the best networking and education events in the region on all things energy.

UPCOMING EVENTS

ASHRAE/AEE GEOTHERMAL SYSTEMS & WELL DRILLING EXPERIENCE

Tuesday, March 28 • 5:00 - 8:00 PM
Embassy Suites
550 Winter Street, Waltham, MA

Tech Session:
Well Drilling Experience
Speaker: Martin Orio, AI

Main Presentation:
Geothermal Systems
Speaker: Andrew Kozak

CWEEL BUILDING COMMUNITY AT WORK

Friday, March 31 • 12:00 PM
Virtual | Free

Everyday awareness and activities to promote an inclusive culture, understanding and recognizing microaggressions, and Bystander Intervention – tips and tactics

FREE | Register

When registering, please **consider making a donation to CWEEL New England** to support us as we grow our regional network of energy professionals that identify as women

ENERGY INITIATIVES AT KEURIG DR PEPPER

Thursday, April 6 • 5:00 - 8:00 PM
Keurig Dr Pepper
53 South Ave, Burlington, MA

Tour the Keurig Dr Pepper Burlington site, network with colleagues, and enjoy a presentation on energy initiatives at KDP

- Limit 50 Registrants -

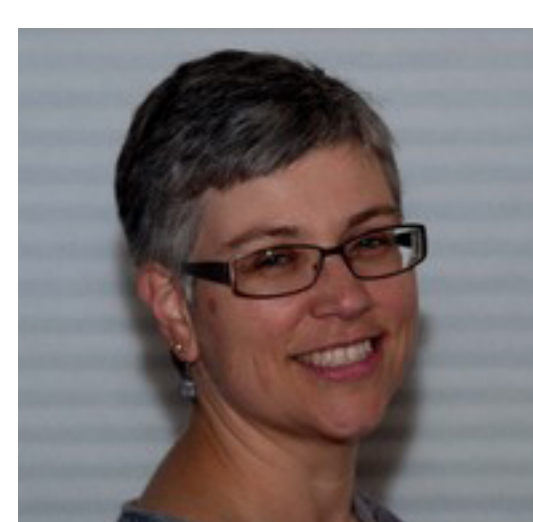

\$50.00 | Register

SAVE THE DATE
2023 AEE-NE GOLF OUTING
June 20 - 9:00 AM Shotgun Start
Sandy Burr Country Club | Wayland, MA

Registration Coming Soon

CWEEL UPDATE

Andrea Moshier - CWEEL Lead

CWEEL New England is having an excellent 2023. Thanks to everyone who attended our January kick-off event at the National Grid Sustainability Hub in Worcester.

Special thanks to CWEEL member Deanna Sassorossi for leading us in an energizing and dynamic workout. We also enjoyed meeting each other over a healthy breakfast and touring the Hub.

On March 31, we're turning our attention to Building Community at Work.

We welcome Sharon Schiffer to lead this free, virtual lunch and learn. This topic is for everyone and applies everywhere!

We'll learn to recognize and react to microaggressions.

According to the Miriam Webster, a microaggression is "a comment or action that subtly and often unconsciously or unintentionally expresses a prejudiced attitude toward a member of a marginalized group." Being better aware and prepared will help us all create a more inclusive culture at work, at AEE, and everywhere else.

[Register Here](#)

Our advisory committee is planning more great in person and virtual events in May, July and September. Contact us at cweel@aeenewengland.org if you'd like to be more involved or have any questions or suggestions.

EM2U/AEE-NE PODCAST

Jackson Stanley
ARDP Nuclear Engineer
Idaho National Laboratory

Decades of worldwide, government-sponsored research in fusion science have established the tokamak-based configuration as the leading approach to confining fusion-grade plasmas with strong magnetic fields. Yet, in the past, even state-of-the-art superconducting magnet technology required tokamaks to be enormous to produce net fusion energy. Recently, a new high temperature superconductor has reached industrial maturity that could provide limitless, clean, fusion energy to combat climate change.
