FROM THE PRESIDENT

Hello Everyone,

It's hard to believe **the 2022-23 meeting season is already drawing to an end.** Earlier this month, we had the opportunity to tour Keurig Dr Pepper's headquarters in Burlington, MA and hear from Paul Lukitsch on KDP's recent energy initiatives. My key takeaway from the meeting was that **there are many low cost, high ROI energy conservation measures out there for most facilities if you know where to look for them.** Thank you to all of those who attended and helped participate in a lively discussion after the presentation.

We have great meeting coming up – a free webinar for **Young Energy Professionals (or YEP)** on May 10.

This meeting highlights our heightened attention to serving the younger generation of energy professionals.

You can register or read more about YEP in the Upcoming Events section below.

June brings the event we wait all year for – the Annual Golf Outing, which will be held on June 20. Registration for golfers officially opened on May 1, so be sure to sign up! We're bringing on sponsors for the event and have a new tier for Tee Box Sponsors. This will **provide companies the opportunity to have a table at one of the holes with giveaways and a representative present to network** with the players as they pass through. You can inquire about this and other golf outing sponsorship opportunities by emailing GolfOuting@aeenewengland.org.

As always, **thank you to all of our sponsors and to those who have attended and contributed to our monthly meetings.** It's been a great meeting season thus far and we're already looking forward to planning for 2023-24! **If you have any meeting topics you'd like to see us address over the next year,** please feel free to reach out to us at info@aeenewengland.org.

CWEEL UPDATE

Andrea Moshier - CWEEL Lead

Thank you to everyone who joined our **"Building Community at Work" event with Sharon Schiffer** on March 31. Sharon helped us understand and recognize microaggressions. The workshop included interactive scenarios in which we were able to practice and review tips and tactics for bystander intervention. **We all left feeling more confident about our skills and ability to promote inclusiveness at work, within AEE/CWEEL, and elsewhere in our lives.**

Unfortunately, due to scheduling conflicts, our May event, **"Climate Concerns at Woodwell Climate Research Center"** has been postponed until the Fall. **We will follow up with a new date soon and anticipate an even better experience for everyone!**

As always, if you'd like to be more involved or have any questions or suggestions, please contact us at cweel@aeenewengland.org

-Andrea Moshier
CWEEL Lead

EM2U/AEE-NE PODCAST

Cole Rosson & Ben Snyder Sparkion

Sparkion is a provider of cost-effective, reliable, AI-driven energy storage. Drawing on the grid and available renewables, Sparkion delivers consistent power to EV-sites, when and where they need it, helping charge point operators reduce costs and become energy resilient. Their proprietary AI-driven software maximizes the use of all DER's (distributed energy resources) on-site, helping fleet operators, fueling stations and charge point operators, optimize energy use and increase site ROI.
